ABOUT ME

I am a BCA student passionate about Web Development and Artificial Intelligence. I have experience in technologies such as React.js, Node.js, Django, HTML, CSS, and JavaScript.
Currently, I am learning AI/ML and working on projects involving Python-based data analysis and machine learning models. I also have basic knowledge of C++ and continue to strengthen it through regular practice.

WORK EXPERIENCE

WEB DEVLOPER
STUDIO SHODWE

As a BCA student with a strong interest in technology, I've gained hands-on experience in web development using React.js, Node.js, Django, and Python. I also have a basic understanding of C++ and am currently learning AI/ML. My focus is on building responsive websites, learning backend integration, and exploring real-world tech applications.

UI/UX DESIGNER

I have a creative approach to UI/UX design with a focus on clean layouts and user-friendly interfaces. I design responsive web pages, wireframes, and interactive components using tools like Figma and Adobe XD. My aim is to create modern, minimal, and accessible designs that enhance user experience and match brand identity.

About me

- Skilled in React.js, Node.js, Django, HTML, CSS, and JavaScript
- Good understanding of Python and beginner-level C++
- Currently learning AI/ML to explore intelligent systems
- Creative in UI/UX Design — wireframes, layouts, and clean interfaces
- Quick learner and problem solver, focused on practical results
- Passionate about building real-world, user-friendly web apps
- Interested in marketing strategies & customer-centric development
- Always updating skills to match current industry trends
